Dear WTSTC Client,

The coronavirus (COVID-19) pandemic has required employers to evaluate how business is conducted in today’s environment. Social distancing, office closures, and other preventative measures have disrupted our normal business process.

WTSTC can provide you access to online safety training and safety orientations that you and your customers require. WTSTC has been providing online training to oilfield contractors for many years. WTSTC has most of the OSHA-required training courses available online. Here are the online training courses most commonly used by our clients. These courses are available in English and Spanish languages.

- Hydrogen Sulfide
- Respiratory Protection
- Hazardous Communications
- Confined Space Awareness
- Electrical Training (Non-Qualified)
- Fire Safety
- Lockout/Tagout
- Fall Prevention
- Personal Protective Equipment
- Blood – Borne Pathogens

In addition, WTSTC has the capability to make your company’s orientations and training courses web deliverable. It is important to note that the online training records are securely maintained in the WTSTC training database. As a WTSTC member, you can download these records 24/7.

WTSTC is a SAFELAND provider. WTSTC delivers the oil/gas industry orientation and other specific training courses in English and Spanish languages. During the coronavirus pandemic, WTSTC has been approved to deliver the SAFELAND orientation, and other certain stand-up instructor-led courses as a “FACE-TO-FACE” web delivered course. One of WTSTC’s approved instructors will teach the course via the internet. Successful students will receive their WTSTC training card, and, if applicable, their SAFELAND training card in the mail. The student’s WTSTC training record will be stored in the WTSTC database, and their SAFELAND training record will be stored in the SAFELAND database.

WTSTC is continuously monitoring the CDC updates and will advise if circumstances and recommendations change.

“MAKING ANY WORKPLACE SAFE”
www.wtsc.org
West Texas Safety Training Center Management is working closely with local officials, industry professionals, and healthcare personnel to ensure we remain prepared to respond to the Coronavirus (COVID-19) as this pandemic evolves. WTSTC considers the health and well-being of our students, visitors, instructors and staff as our highest priority. We understand the concern and challenges surrounding COVID-19 and are committed to being responsive to the needs of our industrial community.

As a precautionary measure, WTSTC is temporarily suspending offsite Safety Meetings to our clients until further notice. We understand that our members utilize this service as an integral part of their HSE programs. However, in light of the recommendations established by the CDC, we feel it prudent to temporarily suspend these services. We apologize for any inconvenience that this may cause.

Currently, WTSTC is taking the following steps to provide a healthy and safe environment:
- Social distancing through increased space between each training station in classrooms and computer lab.
- Disinfecting training stations, keyboards, and all materials before and after use.
- Increased janitorial services

We can arrange to conduct training sessions for small groups of 10 or less (9 students + 1 instructor) if necessary. We are utilizing online Webinar format (Zoom) to provide a distance learning option as well.

WTSTC is continuously monitoring the CDC updates and will advise if circumstances and recommendations change.
